-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2823

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7,11,12,13,14,15 and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Turnbull et al (5803579).

Turnbull et al discloses plural radiation emitters 16 which emit radiation of different wavelengths (col.12, lines 46+) which are necessarily connected to leads to enable power to be applied to the LED's and a polymer matrix 18 made integral with divergent Fresnel lens 27 and secondary lenses 28 and 29 (col.11, lines 49-58 and col.13, lines 29-63). The reference discloses inclusion of a reflective cup (not shown) about the periphery of the lens (col.11, lines 17-25). The assembly inherently includes a surface which can be adhesively attached to a vehicle map assembly as a mechanism of attachment.

Applicant correctly notes that the proper basis for the rejection is under 35 USC 102(e).

Applicant's argument that the reference is not available as prior art because the presence of John Roberts as an inventor of both the instant application and of the patent to Turnbull et al establishes a constructive reduction to practice of the instant invention on the same date as the effective date of Turnbull et al is not persuasive. The reference is available as prior art under 35 USC 102(e) because the invention was described in a patent granted on an application for patent by another filed in the United States before

Art Unit: 2823

the invention by the applicant for patent, i.e. the inventive entity of the instant application is not the same as that of the patent.

Claims 8-10 and 16-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
